

Drinking Water Warning

Chilson and Eagle Lake Water Users (Town of Ticonderoga)

February 17, 2025

The Town of Ticonderoga has failed to provide proper treatment for *Cryptosporidium*.

What is Cryptosporidium? *Cryptosporidium* is a single-celled protozoan parasite commonly found in lakes and rivers, especially when the water is contaminated with sewage and animal waste. *Cryptosporidium* can cause gastrointestinal illness (e.g., diarrhea, vomiting, cramps).

Who is at risk? Infants, some elderly or immunocompromised persons such as those undergoing chemotherapy for cancer; those who have undergone organ transplants; those who are undergoing treatment with steroids; and people with HIV/AIDS or other immune system disorders who can be particularly at risk from infections. You should seek advice about drinking water from your physician or health care provider.

What are the symptoms? Symptoms may include profuse, watery diarrhea, abdominal cramps, vomiting, lethargy, and general malaise.

What should I do? **Do Not Give Water To Infants, Some Elderly Or Immunocompromised Persons Such As Those Undergoing Chemotherapy For Cancer; Those Who Have Undergone Organ Transplants; Those Who Are Undergoing Treatment With Steroids; And People With HIV/Aids Or Other Immune System Disorders Who Can Be Particularly At Risk From Infections.**

ANYONE AT RISK NOTED ABOVE SHOULD USE BOTTLED WATER OR BOILED WATER FOR THEIR DRINKING WATER AND FOOD PREPARATION PURPOSES.

What happened? What is being done? Pursuant to the Long Term 2 Enhanced Surface Water Treatment Rule (“LT2ESWTR”), on or before October 1, 2014, the Town of Ticonderoga was required to provide water treatment for the Gooseneck Reservoir source to inactivate *Cryptosporidium*. The Town of Ticonderoga has been engaged in a process to provide such treatment and/or provide an alternative source of water. As of October 1, 2014, that process has not been completed. The United States Environmental Protection Agency (“EPA”) issued an order dated October 3, 2014 requiring the Town of Ticonderoga to meet these treatment requirements.

February 2025 Update: The Town has selected AES to act as project engineers, and is currently working with Essex County Community Development and NYS Environmental Facilities Corporation to advance testing for water supply. In addition, the Town continues to work with representatives of the US EPA, NY DOH and US Department of Justice concerning the current schedule. As of the date of this notice in November of 2024, no adjustment to the termination date of June 24, 2025 has been made but it is expected that this date will now be amended. Additional information will be provided as it is available.

Further information can be obtained by contacting the Town of Ticonderoga Water Department at 518-585-6144, or logging on to the Town of Ticonderoga webpage at: <http://www.townofticonderoga.org>

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
